

For new and beginning farmers,  
access to land is a **top challenge**.

Land values, development pressures,  
and systemic inequities are limitations.  
Our food system depends on **working  
agricultural land**. Look inside to see  
our impact over the past year!

**Opportunity.  
Stewardship.  
Legacy.**

NONPROFIT ORG.  
U.S. POSTAGE  
PAID  
FIVE MAPLES

*Gaining ground for farmers*

This past year we helped many farmers **secure access** to land or **transfer a farm**, in addition to working with non-farming landowners to **make land available** for farming.

**1,450**

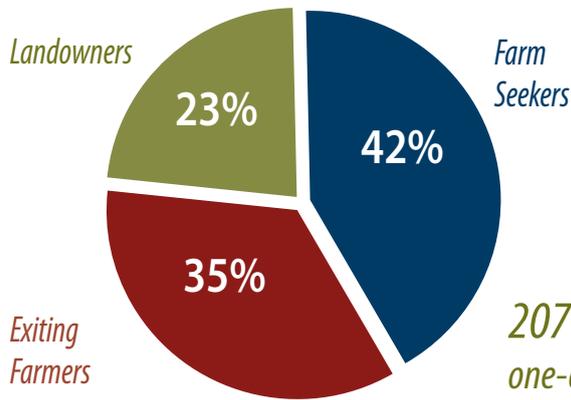

*Farm Seekers enrolled in our course to learn how to acquire a farm*

**1,006**

**5,859**

**1,575**

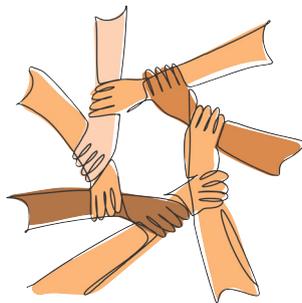

*Exiting Farmers • Farm Seekers • Landowners received resources to transfer, secure, or make land available*

*207 clients received one-on-one advising from 5 field staff*

“ I am prepared with knowledge...  
Now I want to use it.”

This fall we embark on an **equity-infused** planning process where we will refine our strategic approach.

--- FOLD ---

“ I recommend many of your resources to the farmers and landowners I serve. I know it’s helped a lot of people make more informed decisions!”

*Anything Grows Farm, Salisbury, MA.*

We work hard to change the wider food and farming system by **educating** and **connecting** professionals, **collaborating** across sectors, **advocating**, and **conducting policy research**.

**20**  
**YEARS**

*Celebrate with us!  
Watch for our  
20th Anniversary  
coming next year.*

“

I've been farming for 15 years with an ag degree from UMass and while I don't come from significant means, I have more means and more privilege than lots of people. And it was extremely hard for us to find land. If it is that hard for me, it's got to be super hard for others getting started. We have a lot of gratitude for Land For Good's help.
