

MEET EMMY & LITTLE LIGHT FARM

After farming in managerial roles for eight years, Emmy decided to **follow her dream** and start looking for her own farmland.

But **finding land was only the first step**. For Emmy, it wasn't just about gaining access to land for a season or two. It was about building a stable foundation for a farm business that would allow for future planning, investment, and growth.

"I knew it would be important to get help from Land For Good to create a sound lease document that would give me the best chance at longevity at the farm," shared Emmy.

Read Emmy's full story of building stability with a strong lease at landforgood.org.

MAKE AN IMPACT

In 2025, with support from donors like you:

- **Over 1,800 farmers**, landowners, and service providers connected with our training and services.
- **Over 370 cases** acquired support through technical assistance, education, and resources.
- **Over 3,125 acres of land** kept in active farming thanks to working with Land For Good.
